

# INTERAC® Flash and PayPass™

## How does it work?

Member Card® and GLOBAL PAYMENT™ MasterCard® works the same way it always has except now you have two ways to use your card:

- Insert or swipe your card and enter your PIN, like usual, or
- Flash your card and wait for a beep or an approved message. You're done in a flash!

## Is it safe?

- A single flash transaction can't exceed \$100.
- The total of consecutive Flash transactions can't be more than \$200.
- Once you've used the Flash options for \$200 worth of consecutive purchases, you'll be asked to insert your card into the chip reader and enter your PIN. This will validate you as the cardholder and your limits will reset.
- INTERAC® Flash uses NFC (Near Field Contact) and PayPass™ uses RFID (Radio Frequency ID) secure chip technology, which protects you from: Skimming, Counterfeiting, and other fraud and tactics like Electronic Pickpocketing.
- And because you're protected by the Interac Zero Liability Policy, you'll be reimbursed 100% for all fraudulent transactions.

**One Great Tip!** Treat your card like you would your cash!

## What if I lose my Member Card® or GLOBAL PAYMENT™ MasterCard®?

If your card is lost or stolen, contact us right away.
