

Service Charge & Product Changes Effective December 1, 2018

At Debden Credit Union we regularly check our fees & products to make sure that they continue to:

- be cost competitive with other financial institutions,
- cover our costs to provide the service and
- remain affordable and provide value to you, our members.

Effective December 1, 2018 there will be changes to the service charges on personal and business accounts. For more, please review the information below. If you have further questions, our staff members at the Debden and Big River branches are available to discuss the changes.

We're also happy to introduce the CUSAVE® account, our Premium Rate Investment Account. The CUSAVE® account is an investment savings account where the funds are liquid at all time; it's designed to compete with the savings accounts of virtual banks. While there is no minimum balance requirement to maintain the account, premium rate interest is paid only on balances equal to or greater than \$5000.00. This self-serve savings account (through online banking or automatic transfer from the member's chequing account) is perfect for those who are comfortable managing their money using online banking. Interested? Our staff members at the Debden and Big River branches would be happy to set up a new CUSAVE® Premium Rate Investment Account for you.
